Description

Have you ever flown a NOTAR? Most pilots have never seen one let alone enjoyed the experience. The MD520N has been a big part of helicopter aviation in New Zealand for decades being used in utility and private ownership, in my opinion, I think anything with NOTAR is fantastic and the technology makes for a safe quiet ride. When the track on that Main Rotor is dialed in the MD520N is the smoothest light helicopter in the world. Our 520N is currently hangared in Los Angeles where it has just completed an inspection and return to service on the FAA register. Combined with recent new fan straps, M/R overhaul and M/R Blade overhaul with master re-balance; this helicopter makes great power and represents MD with pride. This is a valued helicopter in today's market and Volation is pleased to present it. For more information, contact Stephen Boyce on phone +64 21 540 460 / (or email stephen@flyvolation.com)

Avionics

Flight Deck Manufacturer/Model:

ADS-B Equipped: Yes

Artificial Horizon: Yes

Single Pilot Operation: Yes
