Description

This EC225 /H225 is equipped with state-of-the-art technology such as navigation precision equipment (sensors, inertia reference system, etc) and detection devices (FLIR, RADAR). This EC225 is also equipped with a rotor de-icing system and Multi Purpose Air Intake fly in all-weather conditions and still offers a contained landing footprint. Full SAR Superior Mode navigation with 4-axis coupled autohover and hoist operator joystick and drift control. UNIQUE SAR CAPABILITIES Fully automatic transition to hover Less than 1 m hover accuracy with redundant sensors (dual GPS or Inertial navigation System) capabilities. Fully automatically set up a search pattern Unique automatic fly-away in case of engine failure during hoisting. Return to service with fresh 16-year airframe major inspection and all EASA AD ASB to be performed during 12 months with possible delivery mid-2024. During RTS, engines and components will be optimized for required flight hours and calendar potential.
